Making the Connection

How Calls Flow

Online Tools and Training

Expert online training resources, tutorials, and support.

Enhanced Productivity with Business-Class Features

Increase response capabilities and improve service with a telephone system that allows you to easily handle inbound calls and that helps enhance your customers' perception of your company.

Reliability When It Matters Most

Fully hosted and managed through easy online controls, VoiceManager IP Centrex remains operational through disruptive events with disaster recovery.

Low, Predictable Costs to Your Business

Unlike an on-premises system, with IP Centrex there are no upfront hardware costs. With the added value of unlimited calls anywhere in the U.S. and low per-minute international rates, your company can expect a predictable monthly cost. IP Centrex is scalable and future-proof, so there's no hardware obsolescence concern or need for a large IT staff to maintain service.

Faster Resolution with Expert Local Support

If there is a service issue, Cox will resolve it. No finger-pointing between your IT department, service provider or vendor. Focus on your core business and let Cox Business manage your telephone system.
